Not all variations available. Contact factory for availability.																

- ① When using the transmitted beam sensing mode in high noise (EMF) applications, it is recommended that the 42KL-RxxV receiver be used whenever possible. This will prevent the sensor from “locking on” due to high line voltage spikes.

<b>Operating Distance Selection</b> The maximum operating distance is based on installing the sensor in a relatively clean environment. Normal industrial environments actually range from moderately dusty to extremely dirty. Greater operating margin may be required which can be obtained by reducing the operating distance of the control.	<b>Wahl der Reichweite</b> Die maximale Reichweite basiert auf einer Installation des Sensors in einer relativ sauberen Umgebung. Normale industrielle Umgebungen sind zumeist jedoch relativ staubig bis äußerst verschmutzt. In diesem Fall ist eine größere Betriebsmarge erforderlich, die durch einen geringeren Abstand erzielt werden kann.	<b>Choix de la Distance de Fonctionnement</b> La distance maximale de fonctionnement dépend de la propreté relative de l'environnement d'installation de la cellule. A vrai dire, les environnements industriels normaux vont de modérément poussiéreux à extrêmement sales. Une marge d'opération plus grande peut être nécessaire et s'obtient en réduisant la distance opérationnelle du contrôle.	<b>Selezione Distanza Operativa</b> La massima distanza di funzionamento si basa sull'installazione del sensore in un ambiente relativamente pulito. Gli ambienti industriali normali vanno in verità da moderatamente polverosi a estremamente sporchi. Potrebbe essere necessario un margine di funzionamento superiore che si può ottenere riducendo la distanza operativa del controllo.	<b>Selección de Distancia de Operación</b> La distancia máxima de operación se basa en la instalación del sensor en un ambiente relativamente limpio. Los ambientes industriales normales fluctúan entre moderadamente polvorosos a extremadamente sucios. Es posible que se requiera un margen de operación mayor, el cual puede obtenerse reduciendo la distancia operativa del control.	<b>Seleção da Distância de Operação</b> A distância máxima de operação é baseada na instalação do sensor em ambiente relativamente limpo. Os ambientes industriais normais efetivamente apresentam condições entre moderadamente poeirantes e extremamente sujos. Poderá ser exigida uma maior margem de operação, podendo ser realizada pela redução da distância de operação do controle.
<b>Indicators</b> Green <i>on</i> indicates power on. Yellow <i>on</i> indicates output is energized. Orange <i>on</i> indicates 2.5X margin. Orange <i>flashing</i> indicates short circuit or overload.	<b>Leuchtanzeigen</b> Grünes Dauerlicht: Spannung eingeschaltet. Gelbes Dauerlicht: Ausgang aktiviert. Oranges Dauerlicht: 2,5fache Marge. Oranges Blinklicht: Kurzschluß oder Überlast.	<b>Indicateurs</b> Vert allumé indique : sous tension. Jaune allumé indique : sortie activée. Orange allumé indique : marge de 2,5 X. Orange clignotant indique : court-circuit ou surcharge.	<b>Indicatori</b> Vert acceso indica alimentazione. Giallo acceso indica uscita energizzata. Arancio acceso indica margine 2,5X. Arancio lampeggiante indica cortocircuito o sovraccarico.	<b>Indicadores</b> El indicador verde <i>encendido</i> indica que la alimentación eléctrica está conectada. El indicador amarillo <i>encendido</i> indica que la salida está activada. El indicador anaranjado <i>encendido</i> indica un margen de 2,5X. El indicador anaranjado <i>parpadeando</i> indica cortocircuito o sobrecarga.	<b>Indicadores</b> Verde iluminado indica alimentação ligada. Amarelo iluminado indica saída energizada. Laranja iluminado indica margem de 2,5X. Laranja iluminado indica curto circuito ou sobrecarga.

## Sensor Dimensions—mm (inches)

### DC Sensors

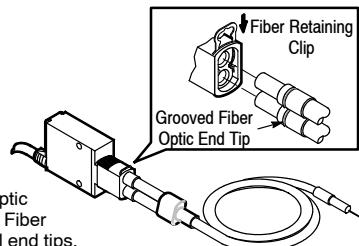

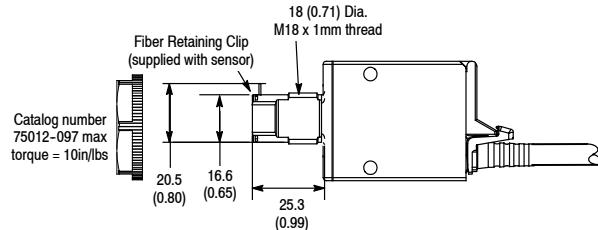

### AC/DC Sensors

Note: All sensors supplied with an 18mm mounting nut (catalog number 75012-097) except fiber optic sensors 42KL-G1xxx and 42KL-L2xxx. They will use an 18mm mounting nut (catalog number 75012-025).

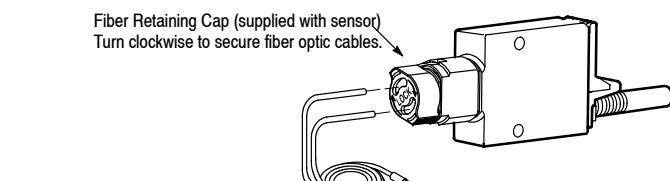

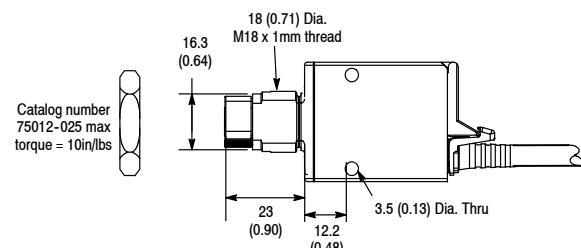

## Sensor Dimensions—mm (inches) (continued)

### Large Aperture Fiber Optic Sensors

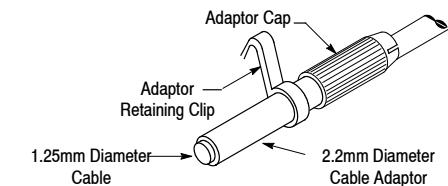

**NOTE:** MiniSight™ large aperture fiber optic sensors require Series "C" Glass Fiber Optic cables with grooved control end tips.

### Small Aperture Fiber Optic Sensors

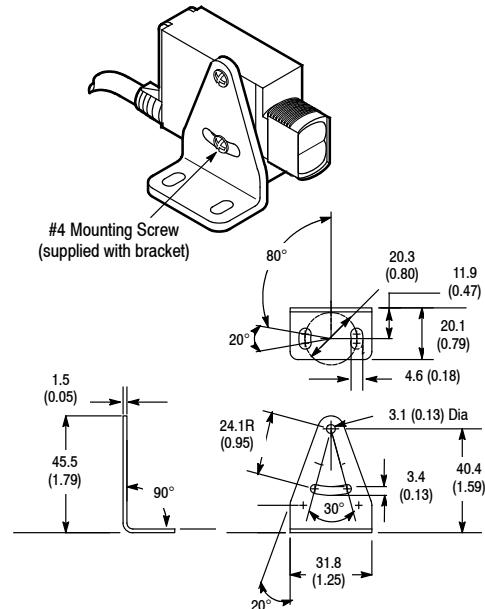

**NOTE:** Small aperture fiber optic cables are also available with 2.2mm (0.09in) diameter control end tips for use with these small aperture sensors. Refer to the Allen-Bradley Sensor catalog.

**NOTE:** For smaller fiber optic cables with jacket diameters of 1.0/1.25mm (0.04/0.05in), catalog number 61-6731 adaptors are required, sold separately.

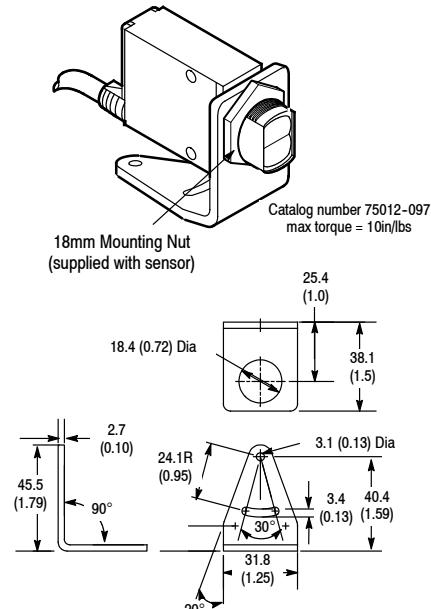

### Accessories—mm (inches)

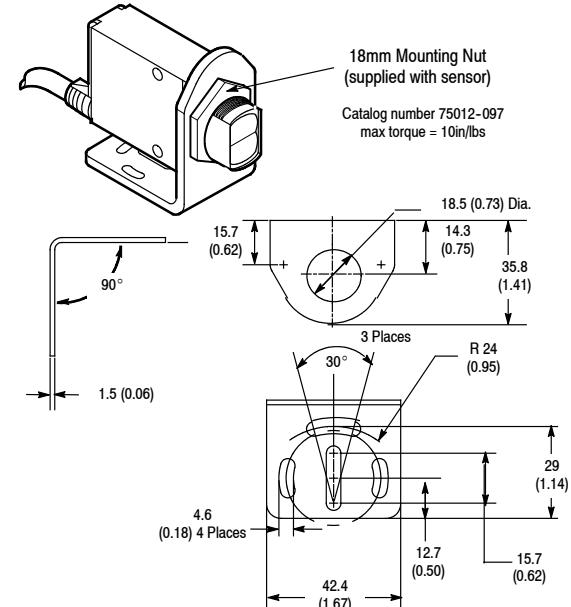

#### Right Angle Side Mounting Bracket #60-2663

#### Right Angle Mounting Bracket #60-2664

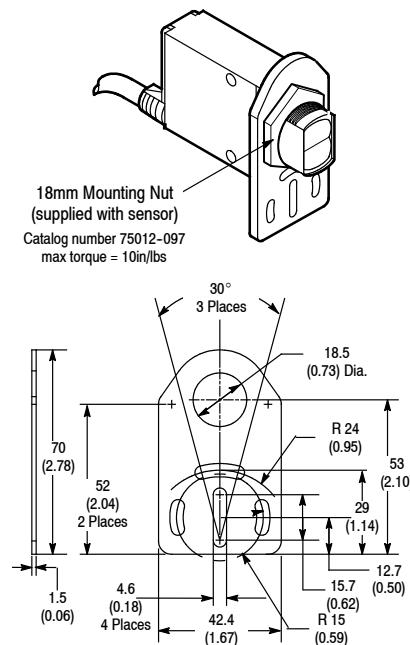

#### Right Angle Mounting Bracket #60-2657

## Accessories—mm (inches) (continued)

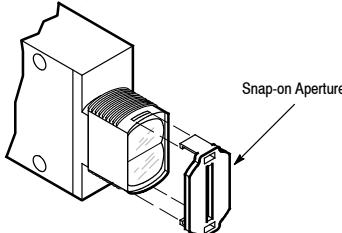

### Straight Mounting Bracket #60-2656

### Apertures

Snap-on apertures for Transmitted Beam applications are available for MiniSight sensors to detect small objects. Select an aperture slot size that will be blocked by the object being detected for best results. An aperture should be placed on both the source and receiver units for proper operation.

- 1mm slotted aperture, Qty. 20: #60-2673
- 2mm slotted aperture, Qty. 20: #60-2674
- 4mm slotted aperture, Qty. 20: #60-2675
- Aperture assortment, Qty. 4 each—1mm, 2mm, 4mm: #60-2676

### Quick-Disconnect Cordsets

#### DC MiniSight Sensors

All quick-disconnect versions of DC MiniSight sensors use 4-conductor micro or pico style quick-disconnect cordset. These cables are PVC insulated and are supplied with gold-plated female contacts and nickel-plated brass hardware.

Catalog Number	DC Quick-Disconnect Cable Description
889D-F4EC-2	Heavy duty 2m (6.6ft) with protective shield
889D-F4EC-5	Heavy duty 5m (16.4ft) with protective shield
889D-F4AC-2	General purpose 2m (6.6ft) nonshielded
889D-F4AC-5	General purpose 5m (16.4ft) nonshielded

#### AC/DC MiniSight Sensors

AC/DC MiniSight sensors with quick-disconnect use 3-conductor micro style quick-disconnect cables. These cables are PVC insulated and are supplied with gold-plated female contacts and nickel-plated brass hardware.

Catalog Number	DC Quick-Disconnect Cable Description
889R-F3AEA-2	Heavy duty 1.8m (6ft) with protective shield
889R-F3AEA-5	Heavy duty 3.6m (12ft) with protective shield
889R-F3AEA-10	Heavy duty 6m (20ft) with protective shield

### Fiber Optic Cable Selection ①

#### Glass Fiber Optic Cables

Sensing Mode	Glass Fiber Diameter	Typical Fiber Model	Maximum Range
Diffuse	3.1 (0.125)	43GR-TBB25SL	38 (1.5)
	1.1 (0.046)	43GR-TFS10ML	21 (0.8)
Transmitted Beam	3.1 (0.125)	43GT-TBB25SL	457 (18)
	1.1 (0.046)	43GT-TFS-10ML	152 (6)

#### Plastic Fiber Optic Cables

Sensing Mode	Glass Fiber Diameter	Typical Fiber Model	Maximum Range
Diffuse	1 (0.040)	43PR-NES57ZS	31 (1.2)
	0.5 (0.020)	43PR-NGS53ZM	12.7 (0.5)
Transmitted Beam	1 (0.040)	43PT-NJS56FS	127 (5)
	0.5 (0.020)	43PT-NBS52FM	38 (1.5)

① Hundreds of other fiber optic cables are available. Consult the Allen-Bradley *Fiber Optic Cable* addendum catalog, publication C114-CA004A-EN-P.
