

Faster installs and reduces complexity

Improving efficiency during installation with maximum return on investment.

An application is only as strong as its support systems. It's not only important to have reliable power, but determining how that power is distributed – whether in commercial, industrial or data center applications – is critical for efficiency.

Telescoping bracket

Broad product offering

Innovative designs that drive lower total installed cost

At Eaton, our research and development team continues to create innovative designs that allow for easier installation and time-savings that drive a lower installed cost. Below are just a few recent innovative designs. To view more innovative Eaton B-Line series fasteners, visit Eaton.com/fasteners.

Telescoping open bracket and box mounting brackets

Eaton's B-Line series telescoping bracket and box mounting brackets help speed installation and reduce complexity on the job site.

The BBT-HF telescoping bracket, used with the BBA and BBA-4 box mounting brackets, provides an extremely flexible, fast rough-in solution. Features like auto-height adjustment, Marty Mouse ears, and hands free installation will have your installers out of the wall in a hurry.

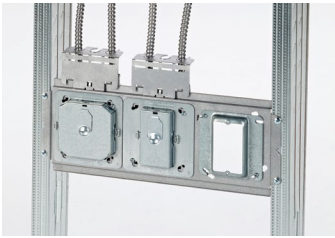

Learn more at Eaton.com/BBT-HF.

Cable hooks

Eaton's B-Line series cable hooks feature a recessed fastener to reduce the risk damage to cables during installation. The cable hooks are available in single-sided, double-sided, multi-tiered cable hook options and include multiple fasteners, attachments and supports for various mounting applications.

Learn more at Eaton.com/j-hooks.

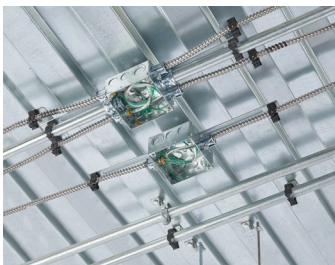

BB8 series box mounting bracket

Its unique design helps take the guesswork out of installation by utilizing a premeasured floor stand to ensure products are consistently mounted at a height of 18 inches. This unique feature allows for a reduction in installation time and added jobsite cost savings.

BRC6M series support

With a unique push mount feature and zip tie locking tab, the BRC6M cable support is designed to help installers save time on the jobsite. Its unique zip tie locking tab design allows for easy securing of up to six MC cables with one support. The built in features of the support helps ensure cables are positioned accurately at 1 and 1/4" from the face of the stud.

Deck hanger

The deck hanger supports conduit or pipe up to 1-1/2" diameter. It is UL listed as a hanger for up to 250 lb. static load, and provides minimum conduit standoff of 1-1/2" to meet the NEC® Section 300.4(E)*.

Learn more at Eaton.com/deckhanger.

* NEC® Section 300.4(E) states that cables and raceways must be installed at least 1 1/2" (38 mm) under the roof decking to prevent potential damage from nails or screws.
