

# BC, BLB, BUB, BT, BUBXL mogul bodies, covers and gaskets

## Applications:

Mogul bodies are installed in conduit systems to:

- Act as pull outlets for conductors that are stiff, due to large size or type of insulation
- Provide the longer openings needed when pulling large conductors
- Prevent sharp bends and kinks in large conductors (protects insulation during installation)
- Provide ample openings for splices and taps
- Provide access to wiring for maintenance and future system changes

## Features:

Mogul bodies have:

- Long openings
- Provision for easy bends
- Taper tapped hubs with integral bushings
- Stainless steel cover screws
- Covers are designed with integral gasket
- SnapPack option – completely assembled with cover, gasket and captive stainless steel screws

BUBXL moguls with rollers:

- Larger internal volume provides additional space for bending and pulling large conductors (complies with the 6X wire bending rule)
- Rollers improve the ability to pull larger conductors and protect the insulation when the wire is being pulled, greatly reducing cut cable incidents
- Cover design takes less time to install and can be used as a solid or with the center removed for more internal volume

## Certifications and compliances:

- Suitable for use in Class I, Division 2 locations when installed per NEC Article 501.10(B)(4)
- UL standard: UL514B
- Fed. Spec.: W-C-586d
- CSA standard: C22.2 No. 18

## Standard material:

- Feraloy iron alloy

## Standard finish:

- Feraloy – electrogalvanized and aluminum acrylic paint

## Options:

### Description

### Suffix

- Material – copper-free aluminum ..... **SA**  
Available in select shapes and sizes
- SnapPack assembly ..... **CG**
