Applications:

Champ® N2MV HID luminaires are used:

- In areas in which ignitable concentrations of flammable gases or vapors will be present due to abnormal, unusual or accidental conditions
- In installations where moisture, dirt, vibration, corrosion or rough usage are concerns
- Wherever the damaging effects of water, wind, snow, sleet, hot sun or any combination of these elements are found
- Ideal for marine use; resists the harmful effects of salt water
- Withstands the harshest of corrosive environments
- To provide low wattage spot and floodlighting
- For general area lighting
- In areas where the ambient temperature will get as low as 40°C (-40°F)
- In manufacturing plants, refineries, chemical, petrochemical and other industrial process facilities, wastewater and sewage treatment facilities, offshore, dockside and harbor installations as well as other heavy industrial applications

Features:

- Housing and mounting modules made of polyphenylene sulfide (PPS) for strength and maximum resistance to corrosion
- Pendant mounting module equipped with integral hub set screws for vibration resistance
- Hubs are provided with an integral bushing to help prevent damage to field wiring during installation and ground connection for positive bonding
- Guard, hub inserts, stanchion elbow and hardware made of stainless steel for maximum resistance to corrosion
- Grounding wire for safety
- Stainless steel open bottom guard permits direct access to the globe for easy relamping
- Hinged assembly allows the luminaire to hang free during installation to permit the use of both hands when wiring
- One external captive screw for ease of installation
- Handle – hinge assembly doubles as a handle for ease of installation, especially when carrying up a ladder

Certifications and compliances:

NEC/CEC:

- Class I, Division 2, Groups A, B, C, D
- 100W max. – Class II, Class III & Simultaneous Presence (Class I, Division 2 and Class II)
