Safety

Safety is essential in the use and maintenance of Greenlee tools and equipment. This manual and any markings on the tool provide information for avoiding hazards and unsafe practices related to the use of this tool. Observe all of the safety information provided.

Purpose of this Manual

This manual is intended to familiarize authorized Greenlee service personnel with the service parts for the Greenlee Battery-powered Pistol Grip Tools listed on this page.

Keep this manual available to all personnel.

Replacement manuals are available upon request at no charge at www.greenlee.com.

IMPORTANT SAFETY INFORMATION

SAFETY ALERT SYMBOL

This symbol is used to call your attention to hazards or unsafe practices which could result in an injury or property damage. The signal word, defined below, indicates the severity of the hazard. The message after the signal word provides information for preventing or avoiding the hazard.

⚠ DANGER

Immediate hazards which, if not avoided, **WILL** result in severe injury or death.

⚠ WARNING

Hazards which, if not avoided, **COULD** result in severe injury or death.

⚠ CAUTION

Hazards or unsafe practices which, if not avoided, **MAY** result in injury or property damage.

⚠ WARNING

Skin injection hazard:

Do not use hands to check for oil leaks. Oil under pressure easily punctures skin. If injured, seek medical attention immediately to remove oil.

Failure to observe this warning could result in serious injury, gangrene, or death.

⚠ WARNING

Do not use solvents or flammable liquids to clean the tool body. Solvents or flammable liquids could ignite and cause serious injury or property damage.

⚠ WARNING

Do not dispose of batteries in a fire. They will vent fumes and may explode.

Failure to observe this warning could result in severe injury from harmful fumes or burns from flying debris.

⚠ WARNING

Read and understand all of the instructions and safety information in this manual before operating or servicing this tool. Refer also to the Operation Manual, which is listed under "Other Publications."

Failure to observe this warning could result in severe injury or death.

⚠ CAUTION

Do not perform any service or maintenance other than as described in this manual. Injury or damage to the tool may result.

Failure to observe this precaution may result in injury and property damage.

⚠ WARNING

Wear eye protection when operating or servicing this tool.

Failure to wear eye protection could result in serious eye injury from flying debris or hydraulic oil.

Note: Keep all decals clean and legible, and replace when necessary.

Indenter and Head Replacement—EK12IDL

This procedure is separated into two sections, one for the indenter and one for the head.

Indenter

1. Lift the latch and open the crimping head.
2. Remove set screw (9), indenter (6), and any spacers (4 and 5).
3. Lubricate indenter tangs that slide against the yoke. Reinstall spacers (4 and 5) and indenter (6).
4. Close crimping head and check that latch and head are fully engaged.
5. Reinstall the battery and advance the indenter to full stroke. Release trigger when the sound of motor speed begins to slow down.
6. Measure the distance between the bottom of the indenter and head as shown below. The distance should measure 4.953 mm to 5.207 mm (.195" to .205"). If the dimension is outside this range, remove set screw (9) and indenter (6).
 - to increase distance, remove a spacer (4, 5).
 - to decrease distance, add a spacer (4, 5).

7. Install indenter (6) and secure with set screw (9).

Head

1. Lift the latch and open the crimping head.
2. Remove the retaining ring (7), pin (8), head (10), and spring (12).
3. Install spring (12) with long end into the yoke hole. Reinstall head (10), pin (8), and retaining ring (7).
4. Close crimping head and check that latch and head are fully engaged.
5. Reinstall the battery and advance the indenter to full stroke. Release trigger when the sound of motor speed begins to slow down.
6. Measure the distance between the bottom of the indenter and head as shown below. The distance should measure 4.953 mm to 5.207 mm (.195" to .205"). If the dimension is outside this range, remove set screw (9) and indenter (6).
 - to increase distance, remove a spacer (4, 5).
 - to decrease distance, add a spacer (4, 5).

7. Install indenter (6) and secure with set screw (9).
