Electrical Apparatus: Terminal boxes, series CTB, CSTB and SA

Installation conditions:

Accessories used for cable entries and for unused holes shall have degree of protection IP 66 and shall be suitably certificate.

When selecting the permitted continuous current for cross section, the maximum permitted electrical current for the terminals and the connecting cable or conductor should be taken into consideration.
The terminals shall be fitted in accordance with the manufacturer's instructions and, when installed, they shall have the minimum clearance and creepage distances required by Table 1 of IEC 60079-7 standard

For terminal boxes with type of protection Ex i the distances between Intrinsic Safety circuits and Non-Intrinsic Safety circuits or between separate intrinsic safety circuits shall be according to IEC 60079-11 standard. Intrinsically safe circuits shall be clearly identified. Where a colour is used for this purpose, it shall be light blue for the intrinsically safe connections.

The service temperature range of the terminals used shall be taken into consideration.

Installation instruction document F-375 provides details of dielectric strength routine test of 2U+1000 Vac with a minimum value of 1500 Vac between the supply terminals and earth.

Warning label:

"Do not open when energized".

For terminal boxes series CTB, CSTB and SA with temperature class T5:

"Use cables suitable for a minimum temperature of 90°C".
