QUICKTRONIC High Efficiency (QHE)

PROStart® T5HO 347-480V High Ambient (HT) electronic ballasts operate SYLVANIA PENTRON HO, PENTRON HO Circline, and DULUX® L T5 lamps with full lumen output and optimal system performance.

QUICKTRONIC T5HO 347-480V HT electronic ballasts allow operation in industrial applications using a 480V AC system. This eliminates the need to rewire existing 480V installations or to drop the voltage by using expensive and bulky transformers. The same product can also be used for 347V applications, allowing for a reduction in inventory model numbers.

QUICKTRONIC T5HO 347-480V HT ballasts are specifically designed for high ambient temperature applications. The ballast may be operated at case temperatures of up to 90°C, making them an ideal choice for high ambient settings such as industrial high-bay lighting.

QUICKTRONIC T5HO 347-480V HT ballasts are RoHS compliant and feature lead-free solder and manufacturing process.

are covered by the QUICK 60+® warranty, the first and most comprehensive system warranty in the industry.

Setting the standard for quality, QUICKTRONIC T5HO 347-480V HT ballasts

System Information

QUICKTRONIC High Efficiency PROStart T5HO 347-480V High Ambient System:

- Voltage errors
 - Reduces inventory by 50%
- Utilizes Programmed Rapid Start operation for:
 - Highest System Efficacy
 - Longer Life
 - Over 100,000 switching cycles for occupancy sensor and building control systems applications

QUICKSENSE ballast technology helps to protect against overheated bases and sockets, as well as cracking of the glass wall, and uses dynamic end-of-lamp-life sensing to avoid false shutdowns caused by some static sensing methods. QUICKSENSE ballast technology will auto reset when the end-of-life lamps are replaced with new ones.

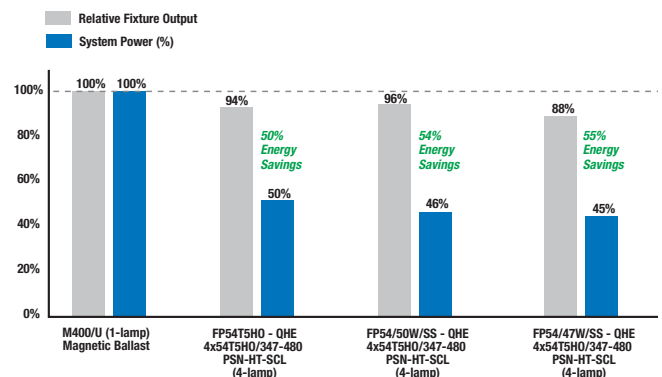

The two lamp unit can be wired for two or one lamp operation. The four lamp "switching" ballast is designed to switch from 4 to 2-lamps, 3 to 2-lamps, 3 to 1-lamp or 2 to 1-lamp. The switching feature can be used with control interfaces, including occupancy sensors.
